Claims 1-12 are pending in this application.

Applicant is requested to update the status of the related application in the specification (page 1). Applicant is advised of a spelling error in claim 7: "solujtion".

Claims 2-3, 5-9 and 12 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 2 depends on claim 1. Claim 1 limits the aqueous solution to those of a polyhydroxide of a C₃₋₆ aliphatic hydrocarbon or a phenoxyethanol. Claim 2 recites polyethylene glycol. A polyethylene glycol is <u>not</u> a polyhydroxide of a C₃₋₆ aliphatic hydrocarbon or a phenoxyethanol. Claim 2 is therefore improperly dependent on claim 1. Similarly, claim 7 depends on claim 1 and recites the same polyethylene glycol. Claim 7 is likewise improperly dependent on claim 1.

Remaining claims here are included in this ground of objection because they depend on the objected claims and fail to cure the deficiency of the objected claim(s).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "cyclic hydroxymethyl oxazolidine" is confusing. The skilled artisan would not be able to determine the metes and bounds of such substances due to confusing nomenclature. It is unclear how "cyclic" is to modify "hydroxymethyl oxazolidine." For example, a hydroxymethyl oxazolidine compound includes compounds such as:

However, since the oxazolidine part is already a cyclic structure, it is confusing to read "cyclic" before "hydroxymethyl oxazolidine." It is entirely unclear how the additional "cyclic" term is to modify hydroxymethyl oxazolidines. Ambiguity lies in the fact that the "cyclic" could merely be an unnecessary description of the cyclic nature of oxazolidine or it could mean that an additional ring structure is involved – if so, what kind of additional ring structure? The Examiner suggests inserting the bicyclic chemical structure shown on specification page 5 into claim 1:

It is noted that the Examiner attempted a telephone call to Mr. Davis on 1/27/2006 in order to pursue a resolution as to these matters, but was unable to timely reach him.

GB 2354771 is cited to further show the state of the art.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to JOHN PAK whose telephone number is (571)272-0620. The Examiner can normally be reached on Monday to Friday from 8 AM to 4:30 PM.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's SPE, Gary Kunz, can be reached on (571)272-0887.

The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571)272-1600.
